WORK EXPERIENCE

Python Developer \ Engineering Manager Globant

08/2021 - Present

Minsk

Projects

- Backend developer (microservices) on the financial valuation and modeling system by one of Big Four accounting organizations. Technical stack: *REST API (Python, Sanic), messaging (Celery, RabbitMQ), database (MongoDB, Redis), CI/CD (Docker)*
- Engineering manager in Minsk development center for Python team. Responsible for career growth, mentoring, interviewing and conflicts resolving.

Data Scientist Silk Data

05/2018 - 08/2021

Minsk

Projects

- Architect and project manager of the extension from Chrome Web Store for analysis and summarization of Google search results. Technical stack: *REST API (Python, FastAPI), summarization (spaCy, own implementation of TextRank)*.
- Data Scientist and backend developer on the ML-based plagiarism system for one of the lead South African universities. Technical stack: *REST API (Python, FastAPI), messaging (Celery, Redis, RabbitMQ), text analysis & comparison (spaCy, Gensim, Scikit-Learn), CI\CD (Docker)*.
- Data Scientist and backend developer on the legal contracts analysis system (clauses detection, referencing to laws, etc.). Technical stack: *REST API (Python, FastAPI), classification (spaCy, Umap, Scikit-Learn), database (PostgreSQL), CI\CD (Docker, Jenkins, Ansible)*.
- Backend developer (microservices) on the ML-based semantic search system. Technical stack: *REST API (Python, FastAPI), messaging (RabbitMQ), database (MySQL), index (Milvus), CI\CD (Docker, Jenkins, Ansible)*.

Python developer CIB Software

09/2017 - 05/2018

Minsk

Projects

- Engine developer on the multilingual OCR system. Technical stack: *C++, Tesseract*.
- Backend developer on the vacancies analysis system for HR specialists. Technical stack: *REST API (Python, Flask), topic modeling & text comparison (spaCy, Gensim)*.

TECHNOLOGIES

FastAPI Flask Sanic Django

RabbitMQ Redis Kafka Celery

Docker Traefik Jenkins Ansible

Pandas Gensim spaCy keras

Swagger Selenium Scrapy

OPEN SOURCE

pydeployhelp

- [pydeployhelp](#) is CLI tool that helps integrating deploy (via Docker) to Python

cookiecutter-api

- [cookiecutter-api](#) is a cookiecutter template for web-service RESTful API on Python

pyRandSeqBot

- [pyRandSeqBot](#) randomly generates a queue for the entered list (for example, the order of speakers at the meeting)

EDUCATION

Information systems and technologies (Software Engineer) Belarusian State University of Informatics and Radioelectronics

09/2015 - 07/2019

Minsk

LANGUAGES

English
Upper-Intermediate

Russian
